EDUCATION

Shri Ramswaroop Memorial College of Engineering & Management
B.Tech – Computer Science (Data Science), Lucknow, India

2022 – 2026

TECHNICAL SKILLS

- **Languages** Python, JavaScript, SQL
- **Backend** Django, Node.js, Express.js, REST APIs, GraphQL
- **Frontend** HTML, CSS, React.js (Basic)
- **Automation & Testing** Selenium WebDriver, Automation Testing, Functional Testing
- **Database** MongoDB, MySQL
- **Tools** Git, GitHub, Postman, Chrome DevTools
- **Emerging Tech** Codex, Agentic AI Workflows

EXPERIENCE

- **Web Developer Associate — CreeSync Software Solutions** Oct 2025 – Present
 - Developing backend features using Django with focus on API design and scalable architecture.
 - Worked with GraphQL APIs, implementing queries and optimizing data fetching.
 - Improved API performance by analyzing request/response cycles and backend workflows.
 - Collaborated with developers to debug issues and enhance system reliability.
- **Automation Intern — Laitkor Labs** Mar 2025 – Sep 2025
 - Developed Selenium automation scripts using Python to validate end-to-end workflows, improving test execution efficiency by 40%
 - Worked with dynamic elements, improving understanding of DOM structure and application behavior.
 - Maintained automation frameworks and collaborated using Git-based workflows.

PROJECTS

- **SnoRelax – Full Stack Mental Wellness Platform** sno-relax-client.vercel.app
 - Developed a full-stack application with mood tracking and chatbot interaction features
 - Implemented role-based authentication and structured backend APIs
 - Designed scalable backend architecture for managing user data and sessions
 - Tech: React.js, Node.js, Express.js, MongoDB
- **Student Task Management Backend API**
 - Built a role-based REST API with authentication and task CRUD operations
 - Designed database schema and implemented validation and secure API handling
 - Focused on scalable backend architecture and clean API design
 - Tech: Python, Django, SQL
- **API Error Inspector – Chrome DevTools Extension** GitHub
 - Developed a Chrome extension to detect REST API and GraphQL errors in real-time
 - Improved debugging efficiency by logging failed requests directly in the browser
 - Tech: JavaScript, Chrome APIs
- **Automation Test Suite** GitHub
 - Developed automation scripts simulating real user workflows across web applications
 - Improved understanding of system behavior and backend interaction
 - Tech: Python, Selenium

CERTIFICATIONS

- AWS Solutions Architecture Job Simulation – Forage (Aug 2024)
- Skyscanner Front-End Software Engineering Job Simulation – Forage (Oct 2024)
- Postman API Student Certification
